SAFETY IS PRIORITY

With a passion for performance, the single-engine M600 emphasizes safety and functionality. The all-glass Garmin G3000 avionics suite integrates the most advanced safety equipment available today. A touchscreen-controlled flight deck puts intuitive navigation at your fingertips.

60/40 MODE AND ENHANCED MAP DISPLAY

No longer does the pilot need to sacrifice the scan from the primary view to fly the approach plates or look for upcoming way-points. With 60/40 Mode, all invaluable situational decisions remain right in front of the pilot. Included in the situational awareness package is the premier option SurfaceWatch™.

SURFACEWATCH™

SurfaceWatch provides aural and visual alerts to help the pilot maintain situational awareness and avoid potential runway incursions/excursions during ground and air operations in an airport environment.

60/40

ENHANCED HORIZONTAL SITUATION INDICATOR (HSI)

The Enhanced Map HSI is a new feature designed to increase situational awareness by overlaying additional information onto the HSI display. Just as the HSI provides increased information compared to the directional gyro, the Enhanced Map HSI further improves the HSI by allowing greater information to be conveyed within the primary instrument scan. It can be used while in 60/40 Mode and supports overlays with combinations on Map, SafeTaxi data, Flight Plan, METARs, NEXRAD, Weather Radar, and more.

GFC 700 WITH ENHANCED AUTOMATIC FLIGHT CONTROL SYSTEM

The fully integrated flight control system provides exceptional flight automation with a dual AHRS-based system. The system offers top safety features and incomparable performance, seamlessly integrating a flight director, autopilot, automatic trim and yaw damper into the G3000 suite. It also includes Electronic Stability Protection (ESP), Level Mode, Underspeed Protection (USP), Emergency Descent Mode, and Coupled Go Around, elevating pilot and passenger safety to the highest standards.
